

# Parrot Poppers

Take one bag and crush the top portion (as shown on left), place in microwave on high for about 60-70 seconds (listen for popping).

**Allow bag and corn to cool thoroughly before giving to your parrots.**

Then take bag "top portion" and weave it thru the cage bars for

added fun or for the large parrots, just hand it to them like a foot toy. For those birds who don't like foot toys, just take the cotton or sisal cord (included in package) and tie the bag shut and hang from the playstand or cage. Stand back and watch the fun!

**Our birds LOVE popped corn and now your birds can share in the fun!**
